SUMMARY

Software Developer with training in Artificial Intelligence and Big Data, specialized in microservices architectures and Event-Driven systems with Apache Kafka. Hands-on experience with Java and Spring Boot, Python (PyTorch, FastAPI) and Go, Docker and AWS deployments, computer vision, NLP, and data analysis with Spark and Power BI.
Well-rounded technical profile backed by previous experience in IT systems and support.

TECHNICAL SKILLS

Languages: Java, Python, Go, Kotlin, TypeScript, JavaScript, SQL, PHP, Dart
Backend and APIs: Spring Boot, Spring Cloud (API Gateway, Eureka, Config Server), FastAPI, Flask, REST, WebSockets, JWT, Microservices, CQRS, Saga, Outbox
Frontend and Mobile: React, Tailwind CSS, Zustand, Flutter, Streamlit, WordPress
AI and Data: PyTorch, YOLOv8, ResNet-50, scikit-learn, spaCy, NLP, NumPy, Pandas, Apache Spark, Apache Airflow, Medallion Architecture, Power BI
Messaging and Databases: Apache Kafka, Redis (Pub/Sub, caching), PostgreSQL, MySQL, Firebase, MinIO (S3)
Cloud and DevOps: AWS (Bedrock, Lambda, Aurora, S3), Docker, Docker Compose, Git, GitHub
Observability: Prometheus, Grafana, OpenTelemetry, Jaeger, Zipkin
IT Systems: Windows, Active Directory (domain join), workstation deployment, hardware/software support, Odoo, Contasol

PROFESSIONAL EXPERIENCE

Systems Technician 10/2026 – Present
Grupo Sermicro
- Workstation refresh project for El Corte Inglés: preparing and configuring new devices to replace legacy equipment.
- Asset inventory, domain enrollment, application and printer installation, and security configuration.

Youth Leisure / Canteen Monitor 06/2026 – 07/2026
DXT Servicios
- Coordinated group activities, managed conflicts, and supervised educational activities.

Software Developer (Internship) 04/2025 – 06/2025
Fibromark
- Built an AI chatbot with Flutter and Firebase real-time integration, improving customer support workflows.

Software Developer / SEO (Internship) 03/2025 – 04/2025
Grupo Moves
- WordPress website maintenance, technical SEO optimization to improve organic ranking, and digital content management.

Youth Leisure / Canteen Monitor 06/2024 – 07/2024
A riure
- Coordinated activities for groups of up to 30 participants, managed conflicts, and supervised educational activities.

Youth Leisure / Canteen Monitor 06/2023 – 07/2023
Gedeo
- Coordinated group activities, managed conflicts, and supervised educational activities.

Youth Leisure / Canteen Monitor 06/2022 – 07/2022
Impuls
- Coordinated group activities, managed conflicts, and supervised educational activities.

IT Technician (Internship) 03/2022 – 06/2022
Sermicro
- Updated systems in a corporate environment, resolved hardware/software incidents, and provided end-user technical support.

IT Technician (Erasmus+) 06/2021 – 09/2021
CITAN – Lisbon Naval Base, Portugal
- Supported high-availability servers, maintained infrastructure, and delivered training on naval simulation systems in an international environment.

Administrative Assistant (Internship) 03/2019 – 06/2019
Lems
- Document management, accounting support with Contasol, and administrative organization.

PROJECTS

QuickBuy – Microservices E-commerce
github.com/VictorBledaBeneyto/quickbuy
- 7 microservices in Java 21 and Spring Boot 3.3 (API Gateway, Eureka, Config Server) with virtual threads (Project Loom); Saga Choreography, Outbox, and CQRS patterns (PostgreSQL writes, Redis reads under 1 ms).
- Apache Kafka with 4 partitioned topics and Dead Letter Topics; RSA-2048 JWT, Redis rate limiting, and observability with Zipkin, Prometheus, and Grafana.

Nexus – Real-Time Messaging Platform
github.com/VictorBledaBeneyto/Nexus
- Go backend (Chi, gorilla/websocket) with horizontal scaling via Redis Pub/Sub; React, TypeScript, and Tailwind CSS SPA with automatic reconnection and exponential backoff.
- PostgreSQL full-text search, JWT authentication, Prometheus metrics, and OpenTelemetry and Jaeger tracing; deployed with Docker Compose.

TriageIA – Automated Medical Triage with NLP
github.com/VictorBledaBeneyto/TriageIA-Priorizaci-nM-dica-Autom-tica
- NLP pipeline (spaCy, scikit-learn) classifying clinical dialogues into Manchester triage levels (C1–C5) using 272 OSCE clinical interviews.
- Orchestrated with Apache Airflow, MinIO storage, FastAPI inference API, and Streamlit dashboard; ethical audit that automatically rejects under-triage cases.

Real-Time Face Detection and Pixelation
github.com/VictorBledaBeneyto/DeteccionYPixeladoDeImagenes
- Distributed Event-Driven system with Apache Kafka, YOLOv8, and ResNet-50 (PyTorch) for real-time computer vision; MinIO and PostgreSQL storage and Power BI metrics dashboard.

IoT Energy Efficiency
github.com/VictorBledaBeneyto/Eficiencia-Energ-tica---Aula-IoT
- Medallion architecture and energy consumption forecasting with neural networks (MLP), deployed with Flask.

EDUCATION

Master's in Artificial Intelligence and Big Data 2025 – 2026
CIPFP Mislata

Higher Vocational Degree in Multi-Platform Application Development (DAM) 2023 – 2025
Campus Cámara

Vocational Degree in Microcomputer Systems and Networks (SMR) 2020 – 2022
Campus Aula

Youth Leisure / Canteen Monitor Certificate 2018 – 2020
Accent / Abast

Administrative Assistant Training 2017 – 2019
Jesuitas

LANGUAGES AND ADDITIONAL INFORMATION

Languages: Spanish (native), Valencian/Catalan (native), English (B2)
Awards: 3rd Prize, FP Knowledge Transfer Awards, with VenarIQ, a platform to promote female talent
Leadership: Class representative for two academic years
Soft skills: Teamwork, proactivity, adaptability, results orientation, conflict resolution, and active listening
Other: Driving licence (B). Willing to relocate
